ELLECTRA

ELECTRIC FIREPLACE INSERT

Ellectra is an electric fireplace insert that combines modern technology with stylish, atmospheric design. Its realistic flame effect, with five adjustable flame levels, allows you to enjoy the ambience of a real fire without smoke, ash or the need for cleaning. The unit is exceptionally easy and convenient to operate. It can be controlled using either the remote control or a mobile app for Android and iOS, providing maximum flexibility and ease of use.
With a heating output of up to 2 kW, Ellectra provides additional warmth on colder days while creating a cosy and inviting atmosphere. No chimney or flue connection is required, allowing for quick and easy installation in apartments and houses. Quiet operation, elegant design and practical functionality make Ellectra an excellent choice for those who value comfort, convenience and a modern lifestyle.
